

## KEY MODULE INFORMATION

- Perth Integrated Health Clinic is the current national leader in KEY MODULE health applications.
- The KEY MODULE works with the body's natural physiology to enhance its functioning.
- The KEY MODULE has a cumulative effect, whereby the connective tissue becomes healthier over time.
- There are more than 150 clinically proven scientific research undertaken on the KEY MODULE and its multiple applications since its inception. The device is recognised in Australia as a Class II Medical device by the TGA.

Speech Therapy and Other Health Services

**Perth  
Integrated  
Health Clinic**

Neuromuscular Occupational Therapy

## Key Module

## Key Module at PIHC

NON-INVASIVE

PAINLESS

IMPROVES CIRCULATION

ENHANCES WELLNESS

The KEY MODULE is the latest state-of-the-art rehabilitative system, targeting underlying circulatory issues.

The system stimulates the skin through its:

- Independent motorised rollers to manipulate the connective tissue;
- Negative pressure mechanism which lifts the skin, creating space within the tissue fibres to increase circulation and improve cell metabolism.

## Key Module Applications

Specific protocols within KEY MODULE at the Perth Integrated Health Clinic are as follows:

### ENDERMOTHERAPY (ET)

Clinical management of conditions including:

- Cellulite control and management.
- Localised fat treatment and management.

### ENDERMOSPORTS (ES)

Treatment of sports-related conditions and trauma such as:

- Sprains and strains.
- Tendon and ligament damage and repair.
- Acute muscle trauma or spasm.
- Joint stiffness.
- Lactic acid build-up.

### ENDERMOMEDICAL (EM)

Treatment of specific medically-based conditions such as:

- Neurological conditions affecting muscle tone.
- Cerebral Vascular Accidents (CVA) or Stroke rehabilitation.
- Oedema (fluid) treatment and management.
- Fibromyalgia control and management.
- Lymphoedema control and management.
- Cumulative trauma syndromes.
- Chronic soft tissue conditions.
- Burns and scarring.

**After your initial consultation, your practitioner will be able to determine which protocol is most suitable for your needs.**
