

**HUBER ALLOWS BALANCE,
CO-ORDINATION and CORE STABILITY
to be markedly improved.**

“Dear Ian,

Just to let you know my progress with the Huber.

After a personal referral from a health colleague I decided to utilize your services at Perth Integrated Health.

As you are aware when I first met you I was enduring intermittent back pain which was exacerbated by over twenty years in the nursing profession.

After initial treatment, you recommended to use the Huber to strengthen my core back muscles to further reduce the possibility of further injury. After two week of treatment on the Huber, I have obvious improvement in flexibility and strength. I also noticed a remarkable improvement in balance and reduction in pain.

With each additional session on the Huber I feel confident that I have selected the appropriate course of action.

Yours sincerely,

Jenny.”

Ian Wee, Director/OT of Perth Integrated Health Clinic, is Jenny's primary practitioner. Jenny now utilising the Huber once a month to maintain her baseline strength, balance and co-ordination. She is now working towards toning and re-sculpturing her body shape.
